Instructors who know the Financial Industry

Our instructors each have over 15 years of experience in the insurance industry and have worked in all the fields they teach. Most of our instructors have participated in writing courses, exams and the study guides. We maintain a staff of personnel experienced in “state specific” material.

ABOUT US

Enterprise Training School, Inc. is an approved provider of Pre-Licensing and Continuing Education in multiple states.

Pre-Licensing

As the leader in the Mid Atlantic Region for Pre-Licensing we have successfully trained over 100,000 agents through our classroom and online courses. We consistently earn a superior passing ratio among providers and our students often receive scores in the mid – high 90’s on state exams. We have found a system that works with inexperienced agents, no matter what their background. We are currently approved to offer pre-licensing training in several states throughout the United States.

Continuing Education:

Many agents look to Enterprise to earn their Continuing Education credits. We know keeping your license current is important, which is why we offer our courses in many different formats. Webinar and Classroom CE courses are available every week at multiple times. Online courses are also available for most states and can be completed at your convenience.
